

HORSE

The horses are animals that could be as big as bull.

There are a lot of types of horses, big, small, brown, dark, white...

The horses can be faster than a cheetah, but not more than a lion. They are also mammals. They can live in the countryside,

in a farm, in a stable... They are

vertebrate animals, they eat vegetables,

fruit, grass... They could be as small

as sheep. They can be wild

animals or a type of pet.

Also with horses, you can do

jumping competitions, dressage competi-

tions, or also they can be with

a flamenco dancer.

They are very good animals

They can live around 30 years

They are my favourite animals because
I love riding, I think they are

so so good animals.
