

# WOLF

The wolf is bigger than the mouse, but the wolf is as big as dog. They can be grey, brown, white or black. They have got long paws and sharp teeth.

The wolf can live in the forest of Europe, America and Asia.

The wolf can eat other animals, for example sheep, deer, ...

Many people don't like wolves, because they are more dangerous than dogs, but they can be beautiful animals. In my opinion, I love this animal, but they are as dangerous as lion.
